Рабочая программа

Иностранный язык

Разработана в соответствии с ОС ВО:

Самостоятельно устанавливаемый образовательный стандарт высшего образования - бакалавриат Федеральное государственное автономное образовательное учреждение высшего образования «Национальный исследовательский технологический университет «МИСиС» по направлению подготовки 15.03.02 Технологические машины и оборудование (приказ от 25.11.2021 г. № 465 о.в.)

Составлена на основании учебного плана:

15.03.02 Технологические машины и оборудование, 15.03.02_22_Технологич. машины и оборудование_ПрММиО_заоч.plx Металлургические машины и оборудование, утвержденного Ученым советом ФГАОУ ВО НИТУ "МИСиС" в составе соответствующей ОПОП ВО 30.11.2021, протокол № 35

Утверждена в составе ОПОП ВО:

15.03.02 Технологические машины и оборудование, Металлургические машины и оборудование, утвержденной Ученым советом ФГАОУ ВО НИТУ "МИСиС" 30.11.2021, протокол № 35

Рабочая программа одобрена на заседании

Кафедра гуманитарных и социально-экономических наук (Новотроицкий филиал)

Протокол от 08.06.2022 г., №11

Руководитель подразделения к.э.н., доцент Измайлова А.С.

	1. ЦЕЛИ ОСВОЕНИЯ
1.1	Цель: овладение системой иностранного языка как средством межъязыковой коммуникации за счет знаний особенностей функционирования фонетических, лексико-грамматических, стилистических и социокультурных норм родного и иностранного языков в разных сферах речевой коммуникации, и в первую очередь в сфере профессиональной коммуникации.
1.2	Задачи дисциплины:
1.3	1. Формирование у обучающихся представления о специфике артикуляции звуков, интонации, акцентуации и ритма нейтральной речи в изучаемом языке; навыков в чтении транскрипции; навыков в чтении текстов профессиональной направленности;
1.4	2.Формирование способности к восприятию аудиальной информации элементарного характера на изучаемом языке.
1.5	3.Овладение лексическим минимумом в объеме 3000 учебных лексических единиц общего характера; привитие навыков диалогической и монологической речи с использованием наиболее употребительных и относительно простых лексико-грамматических средств в основных коммуникативных ситуациях;
1.6	4.Ознакомление с основными грамматическими явлениями изучаемого языка в объеме, необходимом для понимания текстов при чтении и переводе; а также привитие грамматических навыков, обеспечивающих коммуникацию общего характера без искажения смысла при письменном и устном общении;
1.7	5.Повышение уровня культуры речи, воспитание толерантного отношения и уважение к духовным ценностям других народов.

	2. МЕСТО В СТРУКТУРЕ ОБРАЗОВАТЕЛЬНОЙ ПРОГРАММЫ								
	Блок ОП:	Б1.О							
2.1	Требования к предвај	ительной подготовке обучающегося:							
2.1.1	Русский язык								
2.2	Дисциплины (модули предшествующее:) и практики, для которых освоение данной дисциплины (модуля) необходимо как							
2.2.1	Подготовка к процедур	е защиты и защита выпускной квалификационной работы							

3. РЕЗУЛЬТАТЫ ОБУЧЕНИЯ ПО ДИСЦИПЛИНЕ, COOTHECEHHЫЕ С ФОРМИРУЕМЫМИ КОМПЕТЕНЦИЯМИ

УК-4: Способен осуществлять деловую коммуникацию в устной и письменной формах на государственном языке Российской Федерации и иностранном(ых) языке(ах), эффективно функционировать в национальном и международном коллективах индивидуально и как член команды

Знать:

УК-4-31 основные современные коммуникативные средства, в том числе на деловую коммуникацию в устной и письменной формах на государственном языке Российской Федерации и иностранном(ых) языке(ах)

Уметь:

УК-4-У1 создавать на русском и иностранном языке письменные тексты научного и официально-делового стилей речи по профессиональным вопросам

Владеть:

УК-4-В1 системой норм русского литературного и иностранного(ых) языка(ов); навыками использования языковых средств для достижения профессиональных целей, ведения деловой переписки

KM1	Контрольное чтение 1	УК-4-31	1. Напишите транскрипцию выделенных в тексте слов. Safety engineers, also known as safety managers, work for companies where job safety is critical, such as manufacturing plants, mining operations and virtually anywhere heavy equipment and machinery is used. They are largely responsible for the safety record of a company, so they must be ever-vigilant to detect signs of potential accidents. To perform their professional functions, safety engineering professionals must have education, training and experience in a common body of knowledge. They need to have a fundamental knowledge of physics, chemistry, biology, physiology, statistics, mathematics, computer science, engineering mechanics, industrial processes, business and communication. 2. Объясните правила чтения по тексту. Professional safety studies include industrial hygiene and toxicology, design of engineering hazard controls, fire protection, ergonomics, system and process safety, safety and health program management, accident investigation and analysis, product safety, construction safety, education and training methods, measurement of safety performance, human behavior, environmental safety and health, and safety, health and environmental laws, regulations and standards. Many safety engineers have backgrounds or advanced study in other disciplines, such as management and business administration, engineering, education, physical and social sciences and other fields. Others have advanced study in safety. This extends their expertise beyond the basics of the
KM2	Контрольное чтение 2	УК-4-31	safety engineering profession. 1. Прочитать текст и перевести. Safety engineers develops programs and processes for safety in a workplace. Once the program are develop, they mays also be charged with puting a new process in writing in the form of a manual. They presents a new program to management ensured they have a thorough understanding so that they coud to implement the program in their specific work areas. They may be to involved with planing and conductting training clases and seminares for workeres. 2. Найти и выписать ошибки, исправить их.

KM5	Контрольное чтение 3	УК-4-31	Прочитайте и переведите текст. Кратко перескажите. ENVIRONMENTAL PROTECTION
	чтение 3		The conservation of natural resources is the fundamental problem.
			Unless we solve that problem, it will avail us little to solve all others.
			Environmental protection is a practice of protecting the environment, on
			individual, organizational or governmental level, for the benefit of the
			natural environment and (or) humans. Due to the pressures of
			population and our technology the biophysical environment is being degraded, sometimes permanently. This has been recognized and
			governments began placing restraints on activities that caused
			environmental degradation. Since the 1960s activism by the
			environmental movement has created awareness of the various
			environmental issues. There is not a full agreement on the extent of the
			environmental impact of human activity and protection measures are
			occasionally criticized. Academic institutions now offer courses such as environmental studies, environmental management and environmental
			engineering that study the history and methods of environmental
			protection. Protection of the environment is needed from various
			human activities. Waste, pollution, loss ofbiodiversity, introduction of
			invasive species, release of genetically modified organisms and toxics
			are some of the issues relating to environmental protection.

			4. They came to this place a long time ago.
			Упражнение 5. Напишите вопросы к ответам.
			1?
			A computer. (The Adams bought a computer.)
			2? They have. They have already met Mr Smith.)
			3. ?
			They met Mr Smith when they were in London.
			They met ivit shinti when they were in London.
			4? They are. (They are going to there again).
			They are. (They are going to there again).
			5?
			5? English. She teaches English.
			6? Travelling. (He was interested in travelling.)
			7.
			7? They do. (They have to get up early.)
			8
			8? At the airport. (He had to meet them at the airport.)
			9?
			The baby's room. (Mary has to clean the baby's room every morning.)
			10?
			Boots. (They have to wear boots.)
			Упражнение 6.
		_1	: r

			1 777 - 77 - 22 - 2
			1. What Tony is writing? 2. What is writing? 3. What Julia want to do? 4. Who does wants a cup of tea? 5. Who President John F. Kennedy killed? 6. Who did invented the telephone? 7. Whose your favorite actor? 8. Who's is this coat? 9. What hand do you write with? 10. Arthur is 21, hasn't he? 11. You're a student, isn't it? 12. They live in Milan, doesn't it? 13. Does Diana like golf, doesn't she?
KM8	Контрольное чтение 4	УК-4-31	Выписать различные примеры, иллюстрирующие грамматические правила английского языка, объяснить их использование: Evolving approaches to environmental protection. Discussion concerning environmental protection often focuses on the role of government, legislation and enforcement, owever in its broadest sense environmental protection may be seen to be the responsibility of all people and not simply that of government. Decisions that impact on the environment will ideally involve a broad range of stakeholders including industry, indigenous groups, environmental group and community representatives. Gradually environmental group and community representatives. Gradually environmental decision-making processes are evolving to reflect this broad base of stakeholders and are becoming more collaborative in many countries. Environmental protection is influenced by three interwoven factors: environmental protection is influencing national level environmental decisions and personal level environmental values and behaviours. For environmental protectionto become a reality it will be important for societies to develop each of these areas that together will inform and drive environmental decisions. Although environmental protection is not simply the role of government agencies they are however generally seen as being of prime importance in establishing and maintaining basic standards that protect both the environment and the people interacting with it. Outlined below are several approaches to environmental protection that are currently evolving. Voluntary Environmental agreements. In industrialised countries voluntary environmental agreements often provide a platform for companies to be recognised for moving beyond the minimum regulatory standards and thus support the development of best environmental practice. In developing countries such as throughout Latin America, these agreements are morecommonly used to remedy significant levels of non-compliance with mandatoryregulation. The challenges that exist with these agreements

			V. Прочитайте и переведите текст. Выполните следующие задания по тексту:
			1. Задайте по одному вопросу каждого типа.
			2. Выпишите по одному предложению в Past, PresentorFuture Simple.
			3. Выпишите несколько предложений в Passivevoice.
			People often said that Thierry Boyle was the most boring man in the
			world. Thierry didn't know why people thought he was so boring.
			Thierry thought he was quite interesting. After all, he collected stamps.
			What could be more interesting than stamps? It was true that he didn't
			have any other hobbies or interests, but that didn't matter for Thierry.
			He had his job, after all. He had a very interesting job. At least Thierry
			thought it was interesting. Everybody else said that his job was boring.
			But he was an accountant! Why do people think that accountants are
			boring? thought Thierry. Thierry thought his job was fascinating.
			Everyday, he went to his office, switched on his computer and spent
			seven and a half hours looking at spreadsheets, and moving numbers
			around on them. What could be more interesting than that?
			But Thierry was unhappy. He was unhappy because people thought he
			was boring. He didn't want to be boring. He wanted people to think that
			he was a very interesting person. He tried to talk to people about his
			stamp collection. But every time he talked about his stamp collection he
			saw that people were bored. Because people were bored when he talked
			about his stamp collection, he talked about his job instead. He thought
			people would be very interested when he talked about his job, but no. People thought his job was even more boring than his stamp collection.
			Sometimes, people even went to sleep when he talked to them.
			Thierry thought about how to make himself more interesting. He
			decided that he needed to be famous for something. He thought about
			his stamp collection, and decided that perhaps his stamp collection
			could make him famous. Perhaps he had the biggest stamp collection in
			the world, or perhaps he had a very valuable stamp. Yes, this was it, he
			decided.
			He wrote a letter to a local newspaper, and asked them if they wanted to
			come and write an article about a local man with the biggest stamp
			collection in the world. The local newspaper wrote a letter back to
L	•		•

Thierry telling him that actually the Queen of England had the biggest stamp collection in the world. Thierry was very sad to learn this, but wrote back to the newspaper telling them that he thought he had the most valuable stamp in the world. The newspaper wrote back to him telling him that the most valuable stamp in the world cost 2, 240, 000 dollars, and asking him if he was sure that he had it. Thierry wasn't sure that he had it. In fact, he was sure that he didn't have it. Perhaps his whole collection was very valuable though...

"Is it worth 10 million dollars?" asked the man from the newspaper on the telephone when Thierry called him.

"Erm, no, I don't think so..."

"Forget it then" said the man from the newspaper.

Thierry thought about other things to make himself famous. Perhaps he could be the best accountant in the world! Yes, this was it, he decided. He told a friend that he was the best accountant in the world.

"How do you know?" asked his friend.

"Well" thought Thierry, "I have a good job, I like it ...it's very interesting ... spreadsheets ... numbers ... taxes ... finance ..." He saw his friend going to sleep. "Hmmm" he thought. "Perhaps I'm not the best or the most interesting accountant in the world."

"Listen Thierry" said his friend when he woke up again. "Perhaps you don't have the biggest or the most valuable stamp collection in the world. Perhaps you aren't the best or the most interesting accountant in the world. But there is one thing – Thierry, you are probably the most boring man in the world."

Yes! Of course! This was it. Thierry could be famous because he was the most boring man in the world. Now he saw that his friends were right. He phoned the newspaper again.

"Hello!" he said. "Would you like to do an interview with the most boring man in the world?"

"The most boring man in the world...?" said the man from the newspaper. "Now that's interesting!"

Next week there was a big article in the newspaper. "The Most Boring Man in the World!" There was a picture of Thierry in his office. There was a picture of Thierry with his stamp collection. There was an interview with Thierry, and interviews with his friends. His friends said they went to sleep when Thierry talked about his job or his stamp collection.

The next day the BBC and CNN called Thierry. They wanted stories about the most boring man in the world. "The most boring man in the world!" they said. "That's so interesting!"

And so, finally, Thierry Boyle, became the official Most Boring Man in the World. You won't find his name in the Guinness Book of Records, because they said that it was impossible to decide exactly how boring somebody is, but it was no problem for Thierry. Now he was famous, now he was so boring that he was interesting.

P3	Контрольная	УК-4-У1;УК-4-В1	1. Complete the sentences. Use the present simple or the
	работа 3		present continuous.
			a. He (not want) to study languages at
			university.
			b. They (visit) China for a month.
			c. It often (rain) in England in spring.
			d. I (play) tennis with Martin tomorrow.
			e. My mother (make) bread every morning. f. Where (you / meet) your friends tonight?
			f. Where (you / meet) your friends tonight?
			g. I normally (work) on Mondays, but I (stay)
			at home today.
			h. (your sister / go) to the cinema every Saturday?
			every Saturday!
			2. Complete the telephone conversation. Use the present simple
			or the present continuous.
			Martha Hi Tim. Are you having a good weekend?
			Tim No, not really.I (1 tidy) my room at the moment.
			Martha I (2 not believe) you! You never (3 do) any
			housework.
			Tim I (4 know), but Adam (5 stay)
			Tim I (4 know), but Adam (5 stay) at our house tonight and he usually (6 sleep) on
			my floor.
			Martha Who's Adam? I (7 not remember) him.
			Tim My cousin, Adam. He (8 study) medicine at university
			at the moment.
			Martha Oh, that Adam! Mmm! What (9 you / do) with him tonight?
			Tim There (10 be) football on TV, so we (11 not go)
			out.
			Martha Really?
			Tim Yes, but don't forget. You (12 hate) football!
			2 Family and the second size 1 and a second
			3. Expand the questions. Use the present simple or the present
			continuous. Then write answers.
			- What / you / do / next weekend? - How often / you / go / to the cinema?
			- What time / you / usually / get up?
			- What / you / wear / today?
			You / like / surfing / the Internet?
			- How much / English / you / understand?
			4. Write the questions. Use the words given.
			A What / do? 1?
			B I'm a student.
			A Oh really. What / study? 2
			?
			B English.
			C you / go out / last night? 3
			D. Vash Lawart to the simons
			D Yeah – I went to the cinema.
			E I'm going on holiday next week. F Really? Where / go? 4
			F Really? Where / go? 4? E To Zakopane, in Poland.
			G I like your watch. Be / new? 5
			7
			H I bought it yesterday.
			5. Underline the correct werk form
			5. Underline the correct verb form. He lives in Barcelona but he stays / is staying with us for a
			a. He lives in Barcelona but he stays / is staying with us for a week.
			b. My car's at the garage so I get / am getting the bus to work at
			the moment.
			c. She usually sits / is sitting at the front of the class because
			her eyesight is not very good.
			d. They're on holiday. I think they travel / are travelling around
			Canada.
			e. My mum doesn't like driving so my dad always drives / is

driving the car.

SAFETY ENGINEER JOB DESCRIPTION

Definition and Nature of the Work. Safety engineers are responsible for keeping people free from danger, risk, or injury in the workplace. They develop safety programs to minimize losses due to injuries and property damage. They try to eliminate unsafe practices and conditions in industrial plants, mines, and stores as well as on construction sites and throughout transportation systems. Safety engineers work for a wide variety of industrial and commercial companies. Many work for insurance companies. Others are employed by government agencies or safety organizations. Still others teach in colleges and universities or work as independent consultants.

Safety engineers work in many different types of industrial and commercial companies to ensure safety in the workplace as well as in the products the companies make. Safety engineers often have other titles, such as director of safety, safety manager, or safety coordinator. Sometimes technicians assist them. The duties of safety engineers vary depending on where they work. Engineers employed in large manufacturing plants often develop broad safety programs. They study the buildings, equipment, procedures, and records of accidents in their plant and point out safety hazards. They may suggest ways to fix unsafe structures or recommend changes in the layout of the plant. Sometimes they draw up plans for the regular maintenance of machinery or teach safe work habits to managers and workers.

Other safety engineers work with designers to make sure that their company's products are safe. They may be responsible for seeing that a new automobile model meets safety standards. Or they may check the design and production of children's toys. Safety engineers who work for insurance companies usually provide consulting services to their clients. They are experts who canspot hazards and recommend ways to eliminate them. For example, they may review plans for a shopping center that is o be insured by their company and point out dangerous traffic patterns. Once the center is built, they inspect it and check that theelevators have been installed properly so that there will not be accidents. They also study maintenance procedures and may recommend that floors be cleaned when customers are not present. The shopping center owners may be able to lower their insurance rates by following the safety engineer's suggestions.

In the trucking industry, safety engineers review patterns of traffic accidents. They study routes, schedules, loads, and speeds to determine how these factors affect accidents. They also inspect trucks for safety hazards. Safety engineers in the mining industry must check to see that underground or open-pit mines meet the requirements set by state and federal laws. They also design equipment, such as lamps that are used underground. During mining emergencies they may be in charge of rescue teams.

- 7. Ask 5 questions to the text and answer them.
- 8. Write out the sentences, containing verbs in Present Simple, Past Simple, Present Perfect and Present Continuous.
- 9. Write sentences from the prompts using the present simple, present continuous, past simple or past continuous tense.
- 1 you / watch TV / at the moment / ?
- 2 They / not see / the match / yesterday
- We / sleep / badly / last night
- What / they / talk about / when I called /?
- 5 How often / you / see / your grandparents / ?

10. Read the text. Translate it.

WORKPLACE SAFETY

Workplace Safety and health laws establish regulations designed to eliminate personal injuries and illnesses from occurring in the workplace. Workplace safety refers to the working environment at a company and encompasses all factors that impact the safety, health, and well-being of its employees; this covers managers, supervisors, partners,

stockholders, officers, and family members of the workers. It does not cover independent contractors or family members of a farm operator. Safety violations can include environmental hazards, unsafe working conditions or processes, drug and alcohol abuse, and workplace violence.

The leading authority administering workplace safety is the Occupational Safety and Health Administration (OSHA). OSHA requires the Secretary of Labor to propagate regulations and safety and health standards to protect employees from having to work in dangerous or hazardous conditions. Every private employer who engages in interstate commerce is subject to OSHA regulations. Standards made by OSHA are published in the Code of Federal Regulations (CFR). The federal guidelines imposed by OSHA are complemented by state regulations, although federal laws and regulations pre-empt state laws where they overlap or contradict one another. Under OSHA, states can pass their own workplace health and safety laws and standards, but they must meet OSHA criteria and approval if they regulate an area directly covered by OSHA regulations. Though, they may regulate in areas not governed by federal OSHA regulations. The amount of state regulation varies greatly.

States with their own workplace conditions law are called "state plan states". Penalties for OSHA violations can be civil or criminal and vary depending on the nature of the violation. OSHA must refer cases to the U.S. Justice Department for criminal enforcement. Typically, however, OSHA relies on civil penalties as a deterrent to violators. Construction safety and health. Construction workers build our roads, houses and workplaces and repair and maintain our nation's physical infrastructure. This work includes many hazardous tasks and conditions such as work at height, excavations, noise, dust, power tools and equipment, confined spaces and electricity. Construction workers incurred the most fatal injuries of any industry in the private sector in 2009, but this number declined in both 2009 (by 16%) and 2008 (by 19%). With this decrease, private sector construction fatalities are down by more than a third overall since peaking in 2006. Economic conditions may explain much of this decline - the total hours worked in construction also went down 17 per cent in 2009 and 10 per cent the year before. These decreases were more pronounced in some construction subgroups. Fatal injuries involving workers in the construction of buildings, for example, were down more than a quarter (27%) from 2008, with most of the decrease occurring in nonresidential building construction (down 44%). Fatalities in heavy and civil engineering construction were down 12 per cent, and the subsector with the largest number of fatal work injuries - specialty trade contractors had 16 per cent fewer fatalities in 2009 than in 2008.

Quantitative metallography A number of techniques exist to quantitatively analyze metallographic specimens. These techniques are valuable in the research and production of all metals and alloys and non-metallic or composite materials. Microstructural quantification is performed on a prepared, two-dimensional plane through the three-dimensional part or component. Measurements may involve simple metrology techniques, e.g., the measurement of the thickness of a surface coating, or the apparent diameter of a discrete second-phase particle, e.g., spheroidal graphite in ductile iron; or, it may require application of stereological methods to assess matrix and second-phase structures. Stereology is the field of taking 0-, 1- or 2-dimensional measurements on the twodimensional sectioning plane and estimating the amount, size, shape or distribution of the microstructure in three dimensions. These measurements may be made using manual procedures with the aid of templates overlaying the microstructure, or with automated image analyzers. In all cases, adequate sampling must be made to obtain a proper statistical basis for the measurement. Efforts to eliminate bias is required. Some of the most basic measurements include determination of the volume fraction of a phase or constituent, measurement of the grain size in polycrystalline metals and alloys, measurement of the size and size distribution of particles, assessment of the shape of particles and spacing between particles. ASTM Committee E-4 on Metallography, and some other national and international standards organizations, have developed standard test methods describing how to characterize microstructures quantitatively. For example, the amount of a phase or constituent, that is, its volume fraction, is defined in ASTM E 562; manual grain size measurements are described in ASTM E 112 (equiaxed grain structures with a single size distribution) and E 1182 (specimens with a bi-modal grain size distribution); while ASTM E 1382 describes how any grain size type or condition can be measured using image analysis methods. Characterization of nonmetallic inclusions using standard charts is described in ASTM E 45 (historically, E 45 covered only manual chart methods and an image analysis method for making such chart measurements was described in ASTM E 1122. The image analysis methods are currently being incorporated into E 45). A stereological method for characterizing discrete second-phase particles, such as nonmetallic inclusions, carbides, graphite, etc., is presented in ASTM E 1245.

Metallurgy.

Metals are the most abundant of materials to supply man's present needs. Modern civilized mankind lives in the Metal Age and the development of all branches of industry, science and culture as well as way of man's life is unthinkable without tools, machines, devices and other metal objects. Man's going from stone to metal was long and complicate. The first metal to be used by man was copper. It made the lives of the people much easier. The first records about copper go back to 6500-5700 BC. The art of blending metals was gradually developed and some alloys formed in this way were stronger, harder and tougher than the metals of which they were compromised. Probably the first

alloy to be made was a bronze; consisting of copper, with about one part in ten of tin. The primitive metallurgists discovered that if a greater proportion of tin were used the alloy was harder, while less tin gave a softer alloy.

The following stage in metallurgy was using iron (the Iron Age). It was in use as early as 2000 BC. There are also occasional references to iron in even earlier periods, but this material was of meteoric origin. Producing pure iron and its alloys was made possible with the accumulated experience in smelting of copper, bronze, gold and other metals and alloys. Mastering iron production gave a powerful incentive to the development of productive forces and technical progress. In ancient times the man knew eight metal-copper, gold, silver, tin, mercury and antimony. By the end of the eighteenth century their number had increased by twenty, but nowadays about 80 metals are produced and used.

The proportion of the chemical elements contained in the Earth's crust is different. The combined amount of ten most spread elements (oxygen -47 percent, silicon-29.5 percent, aluminium-8.05 percent, iron-4.65 percent, calcium-2.96 percent, sodium-2.5 percent and potassium-2.5 percent, magnesium-1.87 percent, titanium-0.45 percent, hydrogen-0.15 percent) makes up 99.63 percent of the Earth's crust, the other elements form only 0.37 percent of the crust.

The availability of metals does not depend on the amount present in the Earth, but on the ease with which their ores can be obtained and smelted. Although one twelfth of the Earth's crust by weight consists of aluminum, many compounds of this metal are unsuitable to be used as ores.

The majority of useful metallic ores contain the metal combined with oxygen, Sulphur, or other elements. Pure minerals are rarely found in nature; they are generally contaminated with gravel, limestone, sand, clay and stone. This are comparatively rich, other contain large amount of gangue.

- 11. Write out the worlds with the same root from the text, define their part of speech and translate them into Russian:
 Example: develop (v) development (n) развиватьразвитие
 life (n), industrial (adj), blend (n), composition (n), discovery (n),
 metallurgy (n), impure (adj), power (n), production (n), chemistry (n),
 available (adj), dependence (n), weigh (v), suitable (adj), major (adj),
 use (n), rare (adj), contamination (n), want (v), term (n), easy (adj),
 exploit(v).
- 12. Find the English equivalents for the worlds and world-combinations given below:

наиболее распространённый вид материалов; удовлетворять жизненные потребности; век металлов; немыслимы без машин; переход человека от использования камня к металлу был длительным и сложным; первые сведения о меди относятся к ... годам; искусство смешения металлов; одна десятая часть олова; начало его использования относятся к ...; редкие упоминания железа метеоритного происхождения; стало возможным благодаря накопленному опыту по выплавке меди; освоение производства железа послужило мощным толчком к развитию; к концу 18 века; земная кора; суммарное содержание десяти наиболее распространённых элементов; производством металлов из руд занимается металлургия.

- 13. Answer the following question:
- What was the first metal used by man?
- What was the first alloy?
- When did people start to use iron?
- How many metals did the man known in ancient times?
- How many metals are produced and used nowadays?
- What are the tan most spread elements?
- What does the availability of metals depend on?
- What does metallurgy deal with?

5.3. Оценочные материалы, используемые для экзамена (описание билетов, тестов и т.п.)

Зачет проводится в конце I,II семестра на I курсе, III семестра на II курсе с целью выявления уровня сформированности у студентов языковых умений и навыков.

Экзамен предусмотрен в конце IV семестра на II курсе

Формой промежуточной аттестации по дисциплине является экзамен.

Ниже представлен образец билета для экзамена, проводимого в устной форме.

МИНИСТЕРСТВО НАУКИ И ВЫСШЕГО ОБРАЗОВАНИЯ РОССИЙСКОЙ ФЕДЕРАЦИИ

Федеральное государственное автономное образовательное учреждение высшего образования НАЦИОНАЛЬНЫЙ ИССЛЕДОВАТЕЛЬСКИЙ ТЕХНОЛОГИЧЕСКИЙ УНИВЕРСИТЕТ «МИСиС»

НОВОТРОИЦКИЙ ФИЛИАЛ

Кафедра гуманитарных и социально – экономических наук

БИЛЕТ К ЭКЗАМЕНУ № 0

Дисциплина: «Иностранный язык»

Направление: 09.03.03 Прикладная информатика

Форма обучения: заочная

Форма проведения экзамена: устная

- 1. Read, translate and retell the text.
- 2. Tell your new friends about your working day. How will it change when you've graduated from the Institute?
- 3. What are the problems of Global Science? How do they affect the scientific area you have chosen

составил доцент.	
Зав. кафедрой ГиСЭН:	
«01» сентября 2020 г.	

Дистанционно экзамен проводится в LMS Canvas. Экзаменационный тест представляет собой итоговую контрольную работу, целью которой является проверка навыкоы владения английским языком по всем видам речевой деятельности. Образец заданий для экзамена, проводимого дистанционно в LMS Canvas

УК-8, 3-1:

1. Choose the correct answer.

УК-8, У-1.

- 1.Read the text. Then read the sentences and write true or false.
- 2.Read the text. Then answer the questions using your own words.

УК-8, В-1.

- 1. Choose one option (100-150 words)
- a. Write an opinion essay with this title: Are you in favour of using mobile phone into the classroom?
- b. Write an email to a friend telling him or her what you would like to study in the future and why.
- c. Write the advantages and disadvantages of social networks.

5.4. Методика оценки освоения дисциплины (модуля, практики. НИР)

Критерии оценки контрольных работ: достижение поставленной цели и задач, уровень эрудированности автора по изучаемой теме, культура изложения и оформления работы, использование литературных источников. Продемонстрировано понимание содержания прочитанного текста. Дано 80-85 % правильных ответов на все вопросы по содержанию текста. 80% заданий выполнено в полном объеме и без ошибок. Не допускается сдача работ, скачанных из сети Internet. В подобном случае работа не принимается к защите и вместо нее выдается новая тема.

КРИТЕРИИ ОЦЕНКИ ЗНАНИЙ НА ЭКЗАМЕНЕ ПО ИНОСТРАННОМУ ЯЗЫКУ

для студентов заочной формы обучения

ЧТЕНИЕ И ПОНИМАНИЕ ТЕКСТА

«ОТЛИЧНО» Задание выполнено полностью: продемонстрировано полное понимание содержания прочитанного текста; Даны правильные ответы на все вопросы преподавателя по содержанию текста; Речь правильно оформлена, ошибок нет.

УСТНАЯ ТЕМА

«ОТЛИЧНО» Задание выполнено полностью, речь имеет логическое построение, правильно аргументирована, понятна, в ней отсутствуют фонетические, лексико-грамматические ошибки, демонстрирует способность логично и связно вести беседу.

ГРАММАТИКА

«ОТЛИЧНО» 100% заданий выполнено в полном объеме и без ошибок.

ЧТЕНИЕ И ПОНИМАНИЕ ТЕКСТА

«ХОРОШО» Задание выполнено: продемонстрировано общее понимание содержания прочитанного текста; дано 80-85 % правильных ответов на все вопросы преподавателя по содержанию текста; речь в целом оформлена правильно, но допускаются ошибки, не затрудняющие понимание

УСТНАЯ ТЕМА

«ХОРОШО» Задание выполнено: речь, в целом, имеет логическое построение, правильно аргументирована, понятна, содержит ряд фонетических, лексико-грамматических ошибок, не затрудняющих понимание.

ГРАММАТИКА

«ХОРОШО» 80% заданий выполнено в полном объеме и без ошибок.

ЧТЕНИЕ И ПОНИМАНИЕ ТЕКСТА

«УДОВЛЕТВОРИТЕЛЬНО» Задание выполнено частично: продемонстрировано частичное понимание содержания прочитанного текста; дано 50-79 % правильных ответов на все вопросы преподавателя по содержанию текста; в речи отмечены ошибки, затрудняющие понимание

УСТНАЯ ТЕМА

«УДОВЛЕТВОРИТЕЛЬНО» Задание выполнено частично: речь не имеет логического построения и правильной аргументации, отражает наиболее общие идеи в ограниченном контексте, в значительной степени зависит от помощи со стороны преподавателя. В речи есть ошибки, затрудняющие понимание.

ГРАММАТИКА

«УДОВЛЕТВОРИТЕЛЬНО» 60-79% заданий выполнено в полном объеме и без ошибок.

ЧТЕНИЕ И ПОНИМАНИЕ ТЕКСТА

«НЕУДОВЛЕТВОРИТЕЛЬНО» Задание не выполнено: продемонстрировано полное непонимание содержания прочитанного текста; дано менее 50 % правильных ответов на все вопросы преподавателя по содержанию прочитанного; речь не воспринимается на слух из-за большого количества ошибок

УСТНАЯ ТЕМА

«НЕУДОВЛЕТВОРИТЕЛЬНО» Задание не выполнено: речь не имеет логического построения и правильной аргументации. Словарного запаса не хватает для общения в соответствии с заданием. Понимание речи не возможно из-за большого количества фонетических, лексико-грамматических ошибок.

ГРАММАТИКА

«НЕУДОВЛЕТВОРИТЕЛЬНО» Менее 60% заданий выполнено верно.

КРИТЕРИИ ОЦЕНКИ ЗАЧЕТА.

Зачтено

- 1. выставляется обучающемуся, если он глубоко и прочно усвоил программный материал, исчерпывающе, последовательно, четко и логически его излагает, умеет тесно увязывать теорию с практикой, свободно справляется с задачами, вопросами и другими видами применения знаний, причем не затрудняется с ответом при видоизменении заданий, использует в ответе профессиональные термины, правильно обосновывает принятое решение, владеет разносторонними навыками и приемами выполнения практических задач.
- 2. выставляется обучающемуся, если он твердо знает материал, грамотно и по существу излагает его, не допуская существенных неточностей в ответе на вопрос, правильно применяет теоретические положения при решении практических вопросов и задач, владеет необходимыми навыками и приемами их выполнения.
- 3. выставляется обучающемуся, если он имеет знания только основного материала, но не усвоил его деталей, допускает неточности, недостаточно правильные формулировки, нарушения логической последовательности в изложении программного материала, испытывает затруднения при выполнении практических задач. Не зачтено

выставляется обучающемуся за отсутствие знаний по дисциплине, представления по вопрос, непонимание материала по

дисциплине, отсутствие решения практической задачи, наличие коммуникативных «барьеров» в общении, отсутствие ответа на предложенный вопрос

8. МЕТОДИЧЕСКИЕ УКАЗАНИЯ ДЛЯ ОБУЧАЮЩИХСЯ

Методические указания

Учебный план дисциплины «Иностранный язык» не предусматривает её теоретического изучения, т.е. лекционного курса, и ограничивается практическими занятиями в аудитории (под руководством преподавателя) и вне учебной аудитории (самостоятельная работа студентов с последующим контролем преподавателя). Обучение иностранному языку в техническом вузе осуществляется на протяжении двух этапов.

Первый этап начинается с корректирующего подэтапа, на котором осуществляется повторение и систематизация языковых знаний, навыков и речевых умений, а также закрепление страноведческих и культурологических знаний, приобретенных учащимися в процессе обучения в средней школе. Указанные знания, навыки и умения являются базой для перехода к вузовскому курсу иностранного языка, что соответствует требованию преемственности подготовки по иностранному языку в средней и высшей школах.

Основным направлением последующего обучения (вторая часть первого этапа и весь второй этап) является достижение практических, образовательных, развивающих и воспитательных целей. При этом на протяжении всего курса обучения иностранному языку продолжается работа по усвоению языковых знаний (фонетических, лексических, грамматических и орфографических), формированию и совершенствованию языковых навыков и речевых умений, а также по углублению и расширению культурологических знаний. Наряду с этим в связи с ограниченной сеткой часов аудиторных занятий при реализации практической цели обучения — формировании способности и готовности будущего специалиста к межкультурной коммуникации — рекомендуется постепенное и последовательное усиление профессионально-деловой направленности обучения в строгом соответствии с реально необходимыми для будущей профессиональной деятельности специалиста адекватными умениями иноязычной речевой деятельности.

Главное различие между первым и вторым этапами состоит в том, что второй этап характеризуется прагматической ориентацией, увеличением объема приобретаемой студентами профессионально значимой информации, а также в расширении иноязычных навыков и умений в разных видах речевой деятельности. Учебное время, отводимое на каждый из указанных этапах, определяется в зависимости от стартового уровня подготовки студентов по иностранному языку.

При обучении практическому курсу «Иностранный языю» в МИСиСе следует учитывать следующее: обучение разбито на два этапа. При обучении соблюдается принцип преемственности: каждый предыдущий раздел курса интегрируется в последующий, на каждом последующем этапе закрепляются навыки и умения, приобретенные на предыдущем. Обучение ориентировано на коммуникативно-функциональный подход к языку и осуществляется по четырем видам речевой деятельности: чтению, аудированию, говорению, письму. Содержание обучения соотнесено с различными сферами делового общения; соотношение часов, выделенных на аудиторную и самостоятельную работу варьируется от формы обучения: очной, очно-заочной, заочной.

Освоение дисциплины предполагает как проведение традиционных аудиторных занятий, так и работу в электронной информационно-образовательной среде НИТУ «МИСиС» (ЭИОС), частью которой непосредственно предназначенной для осуществления образовательного процесса является Электронный образовательный ресурс LMS Canvas. Он доступен по URL адресу https://lms.misis.ru/enroll/KGF6TE и позволяет использовать специальный контент и элементы электронного обучения и дистанционных образовательных технологий. LMS Canvas используется преимущественно для асинхронного взаимодействия между участниками образовательного процесса посредством сети «Интернет».

Чтобы эффективно использовать возможности LMS Canvas, а соответственно и успешно освоить дисциплину, нужно:

- 1) зарегистрироваться на курс. Для этого нужно перейти по ссылке ... Логин и пароль совпадает с логином и паролем от личного кабинета НИТУ МИСиС;
- 2)в рубрике «В начало» ознакомиться с содержанием курса, вопросами для самостоятельной подготовки, условиями допуска к аттестации, формой промежуточной аттестации (зачет/экзамен), критериями оценивания и др.;
- 3)в рубрике «Модули», заходя в соответствующие разделы изучать учебные материалы, размещенные преподавателем. В т.ч. пользоваться литературой, рекомендованной преподавателем, переходя по ссылкам;
- 4)в рубрике «Библиотека» возможно подбирать для выполнения письменных работ (контрольные, домашние работы, курсовые работы/проекты) литературу, размещенную в ЭБС НИТУ «МИСиС;
- 5)в рубрике «Задания» нужно ознакомиться с содержанием задания к письменной работе, сроками сдачи, критериями оценки. В установленные сроки выполнить работу(ы), подгрузить здесь же для проверки. Удобно называть файл работы следующим образом (название предмета (сокращенно), группа, ФИО, дата актуализации (при повторном размещении)). Например, Иностранный язык_Иванов_И.И._БМТ-19_20.04.2020.

Работа, подгружаемая для проверки, должна:

- содержать все структурные элементы: титульный лист, введение, основную часть, заключение, список источников, приложения (при необходимости);
- быть оформлена в соответствии с требованиями.

Преподаватель в течение установленного срока (не более десяти дней) проверяет работу и размещает в комментариях к заданию рецензию. В ней он указывает как положительные стороны работы, так замечания. При наличии в рецензии замечаний и рекомендаций, нужно внести поправки в работу, подгрузить ее заново для повторной проверки. При этом важно следить за сроками, в течение которых должно быть выполнено задание. При нарушении сроков, указанных преподавателем возможность подгрузить работу остается, но система выводит сообщение о нарушении сроков. По окончании семестра подгрузить работу не получится;

6)в рубрике «Тесты» пройти тестовые задания, освоив соответствующий материал, размещенный в рубрике «Модули»; 7)в рубрике «Оценки» отслеживать свою успеваемость;

8)в рубрике «Объявления» читать объявления, размещаемые преподавателем, давать обратную связь;

9)в рубрике «Обсуждения» создавать обсуждения и участвовать в них (обсуждаются общие моменты, вызывающие вопросы у большинства группы). Данная рубрика также может быть использована для взаимной проверки; 10)проявлять регулярную активность на курсе.

Преимущественно для синхронного взаимодействия между участниками образовательного процесса посредством сети «Интернет» используется Microsoft Teams (MS Teams). Чтобы полноценно использовать его возможности нужно установить приложение MS Teams на персональный компьютер и телефон. Старостам нужно создать группу в MS Teams. Участие в группе позволяет:

- слушать лекции;
- работать на практических занятиях;
- быть на связи с преподавателем, задавая ему вопросы или отвечая на его вопросы в общем чате группы в рабочее время с 9.00 до 17.00;
- осуществлять совместную работу над документами (вкладка «Файлы).

При проведении занятий в дистанционном синхронном формате нужно всегда работать с включенной камерой. Исключение — если преподаватель попросит отключить камеры и микрофоны в связи с большими помехами. На аватарках должны быть исключительно деловые фото.

При проведении лекционно-практических занятий ведется запись. Это дает возможность просмотра занятия в случае невозможности присутствия на нем или при необходимости вновь обратится к материалу и заново его просмотреть.

Методика преподавания иностранных языков основывается на применении активных методов обучения. Принципами организации учебного процесса являются:

- выбор метод преподавания в зависимости от различных факторов, влияющих на организацию учебного процесса;
- активное участие студентов в учебном процессе;
- проведение практических занятий, направленных на приобретение практических навыков владения языком.

Содержание практических занятий определяется учебными календарными планами.

Для контроля знаний студентов необходимо проводить оперативный, рубежный и итоговый контроль.

Оперативный контроль осуществляется на каждом практическом занятии в виде фронтального или индивидуального устного опроса студентов. При проведении оперативного контроля могут также использоваться письменные самостоятельные работы, тестовые задания.

Рубежный контроль осуществляется раз в два месяца. Студенты выполняют контрольную работу, которая включает в себя работу с текстом и грамматические задания, содержащие структуры, изученные в данном семестре. Критерии оценок выполнения модуля:

- «отлично» количество правильных ответов от 80 до 100%
- «хорошо» от 70 до 80%
- «удовлетворительно» от 60 до 70%

Итоговый контроль осуществляется в форме экзамена или зачета в конце каждого семестра по завершении обучения дисциплине «Иностранный язык».
